

Technical Test for Go Language

1. Gunakan library echo dan gorm
2. Buat 1 database menggunakan MySQL yang berisikan 4 tabel (member, product, review_product, like_review)

Struktur Tabel:

- a. Member (ID_MEMBER, USERNAME, GENDER, SKINTYPE, SKINCOLOR):
 - Product (ID_PRODUCT, NAME_PRODUCT, PRICE)
 - Review_product (ID_REVIEW, ID_PRODUCT, ID_MEMBER, DESC_REVIEW)
 - Like_review (ID_REVIEW, ID_MEMBER)
 - b. Buat api dengan Go untuk:
 - Insert data ke tabel Member
 - Update data tabel Member
 - Delete data tabel Member
 - Select all tabel Member
 - Select product by ID_PRODUCT dan data review dari product tersebut. Data review yang harus ditampilkan USERNAME, GENDER, SKINTYPE, SKINCOLOR, DESC_REVIEW, JUMLAH_LIKE_REVIEW
 - Insert dan delete data ke tabel Like_review. Api ini untuk 'like' dan 'cancel like' review.
3. Jika memiliki pertanyaan bisa menghubungi email gustavraharjo@unnispick.com or WA message only (085697354985)
 4. Hasil task berupa code dan file format sql dikirim ke email gustavraharjo@unnispick.com atau dapat diletakkan di git lalu kirim link git ke email tersebut

GOOD LUCK
